# Room Acoustics

**MORE THAN SILENCE!**

carcoustics

## schluCCi - the whispering ceiling

SchluCCi - the whispering ceiling is installed in the interior of buildings on walls and ceiling and not only appreciably improves the heat insulation, but also ensures with its open surface texture and the related acoustic effectiveness pleasant room acoustics.

Other colours can be supplied as special colours on request with a minimum order quantity of 100 m<sup>2</sup>.

### Product data

Base material:	melamine resin foam
Diffusion resistance factor (DIN 52 615):	approx. 1 to 2
Material density (EN ISO 845):	8 to 11 kg/m <sup>3</sup>
Fire behaviour (DIN 4102):	B1 flame-resistant
Thermal conductivity (DIN 52 612)	<0,035 W/mK (d=50mm)
Long-term temperature stability:	180°C
Sound absorption factor (DIN 52 215)	>90 % (d=50mm; 2000 Hz)
Short-term temperature stability	220°C

### Simple installation

1. Application of filler
2. Pressing into place
3. Finished

## uniCCart - the acoustic picture

The „uniCCart“ acoustic pictures and elements from Carcoustics display excellent absorption characteristics. The material is already in use as an acoustic measure in buildings, industrial products and at customers in the car industry.

**We print the pictures individually to your specifications.**

### Sample applications

- reception areas
- canteens
- restaurants
- offices
- meeting rooms
- and much more

## aCCubo - the multi-purpose cube

Our aCCubo not only ensures a quiet and calm atmosphere thanks to its acoustic efficiency, but it can also be used as a room divider, a seat, an advertising medium, something to play with and a learning tool.

**We print the cubes individually to your specifications.**

### Technical details

Material:	polyurethane foam
Dimensions:	can be customised to your specifications on request
Price and delivery time:	on request
